Stratis is the native value currency in the Stratis Platform, it fuels the creation of private and public custom blockchains for corporate use. The Stratis Platform offers a one-click deployment system for custom blockchain deployment.

These blockchains can be customized to suit the companies' needs, and can even be deployed to mimic the features of popular blockchains like Ethereum or Lisk, which can be tested individually or in parallel.

The Stratis team will also function as a London Based consultancy agency that will help businesses to deploy the blockchain that best suits them.

STRATIS CONCLUSIONS

STRATIS meets the specific conditions to become a perfect asset in which to invest in the long term.

Its limited offer, its reduced price, the big project and the support that has behind it makes of it one of the indispensable coins for those investors in the long term.
